

Value Proposition

Let's be honest there are a lot of sheave and bushing suppliers in today's global marketplace. While Masterdrive products are dimensionally interchangeable with industry norms we distinguish ourselves in a number of important product and service areas.

The Product

Control over the quality, engineering, design, and availability.

All sheaves and bushings come from our **own** foundry in China. We don't broker production out or move it around so we have consistent production flow.

The best looking product on the market.

Every part, sheaves and bushings (except powdered metal H bushings) are phosphate coated. The phosphate coating yields the best paint adhesion and corrosion resistance in the marketplace. Sheaves then receive a baked enamel finish.

Sheave mounting flexibility

Masterdrive offers 3 mounting arrangements utilizing QD Bushings, DST Bushings and TL Bushings all from stock

The Availability-Excellent. We know you have other options so we strive to make your life easy.

- Over 7,000 part numbers in inventory
